## DAISY player Telex Scholar

**Telex Scholar**, the world's smallest and least expensive DAISY player, can play all current DAISY formats (2.0, 2.02 and 3.0), as well as CD, CD-R and MP3-CD. Produced especially for dyslexics and the visually impaired, it is the only player with a large 6-row LCD display, which is designed to facilitate users with reading and writing difficulties. The player recognizes CD types automatically – no adjustments necessary.

Headphones and adapter included. External speakers can be plugged in without difficulty.

- Compatible with current and future versions of DAISY
- 2 processors
- Small and user-friendly.  
Size: 13.3 cm x 15.2 cm x 4 cm. Weight: 0.3 kg
- Specially designed for dyslexics/visually impaired
- Variable playback speed without altering the voice pitch
- 32 bookmarks per book for up to 32 books (total: 1024 bookmarks)

- Announcements available in English, Swedish or Finnish (you decide)
- LCD display
- Headphones
- USB port
- Powered by accompanying adapter (6V, 500 mA) or 4 x AA alkali batteries
- Speaker output
- Controls: volume, play, stop, pause, "go to", page, bookmark, variable speed, 10 numerical buttons, key lock, undo, 4 navigation buttons

# We have been producing talking books since 1990.

**SpeakingBooks** is the international name given to the Swedish company Inläsningstjänst AB.

We have been producing talking books since 1990.

Our many years of experience and our insistence on quality make us one of Sweden's leading producers of talking books.

We produce approximately 13,000 hours of spoken material per year.

For 15 years we have been supplying material to TPB, the Swedish Library of Talking Books and Braille.

We convert cassette recordings to DAISY for TPB and RNIB. We have the capacity to convert 30,000 cassettes per year to DAISY.

High capacity for the production of DTBook for, among others, TPB.

The Swedish Government and the Swedish Social Insurance Agency are examples of organisations that rely on us for voice recordings.

Since 1995 we have been producing educational materials for students with difficulties reading and writing/dyslexia. We have agreements with all the major producers of educational materials in Sweden and can offer audio versions of much of their output on CD and DAISY.

A club for all Swedish libraries, BTK Biblioteksklubben, was founded by us. To sum up: we know talking books!

## What is DAISY?

(Digital Accessible Information System)

A **DAISY** disc may contain up to 50 hours of recorded material, meaning that most books fit on a single disc. With a **DAISY** player you can browse by page, chapter, heading and bookmark. The bookmark function allows you to mark points in the book that are easily searchable later. It is also possible to change the playback speed without altering the pitch. **DAISY** is an outstanding tool for all readers of talking books.
